

System shall include six separate sections of 24-volt DC red LED light strips that mount to the rear of any competition 42" x 72" or 48" x 72" glass backboard. LED strips shall be mounted to the glass by means of pre-applied self-adhesive tape. When connecting to a scoreboard or shot clock that emits a 24-volt DC signal (ie: Bison SHCLK300) no additional power transformer shall be required. Order Bison BALED2.0T to convert 120-volt AC signal to 24-volt DC signal. Complete system shall include the LED strips and wire connectors for two backboards. Additional wire needed to connect system to existing shot clocks and scoreboards shall be provided by customer or installer. Two-year limited warranty.
